THE POINT OF SALE!

Microcomputers are at least as wonderful as everyone says they are. Now there is a program available that lets the small to average sized retailer get in on this wonderful world. The Advanced Point of Sale system. The screens at the left give just a hint of the enormous power of APOS. The full story is inside.

APOS MAKES CASH REGISTERS OBSOLETE!

Even the "smartest" cash register is only a drawer with a brain. APOS is a brain with a cash drawer.

Fewer keystrokes. More information. Quicker transaction processing. Less chance of error.

EASY TO LEARN! EASY TO USE!

There's enough for your employees to learn. Can you afford to teach them "computer literacy" too?

You don't have to. Running APOS is *easier* than running a cash register!

All keys are labeled. Almost all entries are single or double keystrokes. No need for fancy typing skills.

APOS calculates taxes and change. Recalls all prices automatically. Eliminates mistakes during the sale.

Your operators learn the program by *using* the program. There's almost no "teaching time" involved. With the training diskette, our step-by-step manual, and a little hands-on time with the system, your worker is ready to work.

INSTANT INVENTORY INFORMATION!

APOS is designed to work with any one of a number of Inventory Control programs available. Your dealer can recommend the right one for you.

By working together, the two programs put an extraordinarily powerful tool in your hands. Information.

Instantly, during every transaction – cash sale, charge sale, or return – your inventory is updated, and the quantity available is displayed on the screen. Shortages are spotted immediately!

FLEXIBILITY

APOS adapts to your store policies.

You define the tax codes, charge types, receipt copy, and register access codes.

With the push of a key, you can override a price, add taxes or not, void any part or all of a transaction.

You can accept returns as separate transactions or any time while posting a sale.

And you can buy APOS for nearly any microcomputer system available.

SECURITY!

Until the proper code is entered, no one can enter the cash drawer. You set the code.

No one can change the price, alter the cash figures, or pull reports until the code is entered.

No one but you can access the policy control portions of APOS. But for you, it's easy. Because you set the code.

TWO TRAINING MANUALS

Your employees will learn what they need to know about APOS from a light-hearted booklet that guides them step-by-step through every contingency they'll face.

You'll learn the inner workings of APOS from a little longer booklet which teaches you to personalize APOS for *your* store.

WHO NEEDS APOS?

APOS is not intended for the giants. They've had computers for years.

APOS is designed to bring this astonishing power to the average to smaller retailer.

Any store that currently has one to six cash registers and a diverse enough inventory to demand control needs APOS. If that's you, select one of the options on the return card, and send it to us right away.

If you wish a demonstration disk, please supply all the "System Information" asked for in the reply card. Some of the systems APOS supports are 5¼" IBM, Olivetti and Televideo, and 8" SS/SD. Operating systems supported are CP/M, MP/M, MSDOS (PCDOS), Mmmost, TurboDOS, and PCOS. If your system is different, feel free to call ADI (505) 345-8665, and we will do what we can to send a demonstration compatible with your hardware.

APOS sounds like it would be right for our operation. I'm interested in learning more.

- Enclosed is \$100.00 (check or money order, credited toward purchase). Please send me a working demonstration disk and the two APOS Training Manuals.

System Information: (please print)

Computer/Terminal: _____

WE WANT TO BE YOUR SOFTWARE RESOURCE.

Now computers are small enough and cheap enough to really do you some good. Particularly if you're in business.

We're in business to make computer software that's right for business. Easy to use. Reliable. Instant and accurate.

ADI software is fully field tested and debugged before it's ever published and available to you. It is completely and clearly documented. And it meets the real needs of real businesses.

We're proud of the professionals at ADI who make good our promises.

Through each step we keep you in mind. Because we want to be your software source.
